

The thermo compost bin with the unique ventilation system!

1

Automatic moisture transport
Moist exhaust air passes through a couple of openings at the top. (More than 70 % moisture in green composting material.)

2

The labyrinth ventilation system ensures transport of oxygen into the compost and moisture out of the compost.

3

The composting material rots much faster and odourless due to the **perfect ventilation**.

4

Two big discharge flaps on opposite sides for easy removal of finished compost.

5

Compost grate, scientifically proven against rodents, lets pass useful compost worms.

6

Fresh air with oxygen passes through a couple of openings into the composter.

AEROQUICK 290

Dim. 72 x 72 cm (2,36 x 2,36 FT),
H 80 cm (2,62 FT), ART. No. 20172

CAPACITY
APPR. 290 L

Small gardens

AEROQUICK 420

Dim. 80 x 80 cm (2,62 x 2,62 FT),
H 106 cm (3,47 FT), ART. No. 20165

CAPACITY
APPR. 420 L

Small to medium
gardens

AEROQUICK 700

Dim. 94 x 94 cm (3,08 x 3,08 FT),
H 109 cm (3,57 FT), ART. No. 20168

CAPACITY
APPR. 700 L

Medium sized gardens

AEROQUICK 900

Dim. 107 x 107 cm (3,51 x 3,51 FT),
H 109 cm (3,57 FT), ART. No. 20169
